ROUNDTABLE SUMMARY

Our businesses and the world over have been shocked: Artificial Intelligence and ML have become commonplace, a resource which finally crossed the margins and is becoming mainstream and "easy to use" in so many fields of human and enterprise endeavour, that it seems most of what we do in any functional area in a business will soon be turned roots up. Many areas in the business have rushed to apply and look for use cases and applications, often not really having a true measure of what good looks like. The promise looks good and we start asking how we might leverage this disruptive innovation as soon as possible. We will discuss how this disruption is affecting and empowering our businesses to learn more about what are the dos and the don'ts so far in this integration-disruption phase for our business and our practitioner communities. the don'ts so far in this integration-disruption phase for our businesses and our practitioner communities.

ROUNDTABLE KEY TAKEAWAYS

1. What is the disruption and the opportunity? what's new?
2. What is the size of the prize?
3. What will be key to succeed or at least avoid evitable pitfalls?
